for your Chevy
and shipped direct
to your front door!"

0-60 mph TEST RESULTS:

Street/Strip D.U.I. vs. Stock H.E.I.

After installing our D.U.I. in an '80 Chevy Truck with a 350 cid motor, 268 Comp Cam, with 92 pump gas, we reduced our aver 0-60 mph ET by 2.44 seconds. On our best test run, we cut an incredible 3.5 seconds of our ET! Both tests were conducted using our "LiveWires" spark plug wires

PARTS BIN

Hoser

Performance Stainless Steel (866/335-7901, www.performancecsst.com) announces its newest line of heater hose fittings, bypass hose fittings, pipe plugs, and accessories. Performance fittings replace conventional metal fittings with extremely durable, ultra-smooth, highly rust- and corrosion-resistant 304 stainless steel. Performance guarantees its fittings not to rust or corrode for 1 year. Fittings are available in hex and 12-point, in 3/4- and 5/8-inch hose IDs, and lengths between 1-3/4 to 2-7/8 inches.

Tight!

Tighten up '55-'57 interiors with these A-pillar windlace retainers from C.A.R.S. Inc. (800/CARSinc, www.carsinc.com) They are reproduced specially to fit all '55-'57 Chevrolet full-size models including convertibles, station wagons, and Nomads. Windlace retainers are zinc plated for added protection against corrosion, and may be top coated to match color. They are only sold in sets, and just for the record, they're made in the USA.

Honey They Shrank The Nitros

When you hear the words Super Chevy Show what comes to mind? Well of course cars, accessories, parts, girls...but to anyone who has ever attended a Super Chevy Show will tell you, Nitro coupes. This crowd favorite racing series is

getting even bigger now, or should we say smaller? Funline Merchandise Co. (15400 Don Julian Rd., Dept. SC, City of Industry, CA 91745, 626/336-6681, www.musclmachines.com) is now offering 1:64 scale models of Super Chevy Show Nitro Coupes. Each car is a die-cast adult collectible. With six of the most popular Nitro Coupes around, be sure to get your hands on them quick!

Big Book Of Knowledge

The quest for big cubes doesn't have to lead to a big-block anymore. Now you can add cubic inches to your current small-block power plant without having to swap intakes, headers, motor mounts, and other accessories.

How To Build Big-Inch Chevy Small Blocks, by

Graham Hansen, leads readers step by step in selecting OEM or aftermarket blocks, cranks, rods, and pistons to construct their big-inch short-block. The book also covers how to select the best heads, cam, induction, and exhaust systems specifically for a big-inch engine. In addition, the final chapter includes seven different combinations for big-inch power complete with dyno graphs! The book is 128 pages long with 320 black and white photos and illustrations. Each book retails for \$18.95 and is available from CarTech, Inc. Orders may be placed by calling 1-800-551-4754 or visiting www.carttechbooks.com.

How to Build BIG-INCH CHEVY SMALLBLOCKS

SPF 350F

Kimberly-Clark (contact pschaefe@kcc.com, or visit www.block-it.com) announces its new car cover fabric, Block-It 350F. It is a triple layer SFS (spunbond-film-spunbond) fabric that features strong spunbond outer layers and a microporous film inner layer. The fabric's middle film layer provides a barrier that impedes water while promoting the evaporation of trapped condensation, which allows heat and water vapor to escape. In addition, Block-It 350F features Kimberly-Clark's latest generation of protection against ultraviolet rays to prolong the appearance and life of the car's painted and interior surfaces.
